

Welcome to the ESC-family

International Day 2026

23 August 2026

What are we going talk about?

- Why ESC was established
- What we did achieve so far
- The way ESC works and how that helps

First some history

- 2020-2023: EU Citizens' Initiative:
Stop 5G - Stay connected but protected
 - To protect the health of all life from EMFs
 - To protect against other adverse effects of 5G on environment and privacy.
- 83.000 signatures from 19 EU countries
- Needed: 1.000.000 signatures
- Lots of information still available: signstop5g.eu/nl

Why ESC was established

1. The cooperation for ECI was great
2. The objectives still relevant
3. Many national laws originate from higher levels
4. We can learn by sharing knowledge and experiences
5. We can join forces and make a stronger stand together
6. Together, we can become more effective

Why ESC was established 2

Conclusion :

We must continue this work together and use ESC as a tool

- We must connect in Europe and intercontinentally
- To achieve the objectives to limit EMF health risks
- With a special focus to EHS

So, ESC was formally established

- May 2023
- Seat in Belgium
- No subsidies, limited income
- 43 Member Organisations in 18 European countries
- And still growing

Stichting EHS

POEM26

23 Augustus 2026

Stichting EHS - Internationale Dag

The organisation of the ESC

- Board - Advisory Board - Working Groups - Teams
All volunteers from the national organisations
- Intercontinental cooperation
- Platform - Eg scientists, lawyers, physicians
- Most activities on-line
- General Assembly decides annually on work programme
- Publicity through: esc-info.eu, Social media, ESC-Newsletter

What did we achieve so far?

Some examples

- Conference in [Kassel](#)
- Webinar about [Children and Digital Hazards](#)
- [EU Commission is challenged](#), concerning SCHEER (with Priartem)
- We bring our message of EMF health risks in several EU health committees
- Film [The Rights of the Children in the Digital Age](#)
- Several activities on the UN level
 - to get EHS into the International Code of Diseases
 - Human rights for elderly
 - with ICBE-EMF - Advisory to WHO DG on Radiation and Health
 - Participate in WHO-Environment and Health Process
- [Safety Card](#)

Our Working Groups

On Politics:

- Law & Politics
- Have your Say
- UN/WHO,
- Health
- ICD-11

On education/information:

- Children,
- Technical Solutions,
- Smart Meters,
- White Zone,
- Education

How do we work together in ESC?

Some examples:

Nl: Human rights and inclusion for EHS – how to apply in EU countries

It: Get EHS recognised by entering symptoms in online ICD-11 system

Cz: Film Childrens Rights in Digital Age - voice actors for local languages

External Question: No Scan Card for airport resulted in Safety Card

De: Photobook trees damaged by EMFs for all to raise awareness

HYS: Prepares examples for all how to react on new policies and laws

Resume:

How does the process work?

1. Ideas from member organisations are put forward to ESC (wish, knowledge, approach, experience)
2. ESC board decides to accept
3. (New) WG draws up a work plan
4. ESC Board reviews and gives approval
5. WG will get to work and produce results
6. Board reviews results
7. Outcome available and communicated to all

Would you like to get involved?

- Feel welcome
- All are invited to participate in ESC as a representative of your national organisation
- Show your interests at the contact form:
